 - It may take longer time for the insured to receive fund documents than purchasing investment units directly from the asset management companies as the Company will proceed to deliver the documents to the customers upon receiving them from the asset management companies.

Validity of Insurance Contract

In case the insured knowingly makes false statement or knowingly omits to disclose any fact to the Company for acknowledgement while applying for the insurance, where if the Company had known of such fact, the Company may be induced to charge higher premium or cost of insurance or refuse to enter into the insurance contract, then this insurance contract will be voidable according to Section 865 of the Civil and Commercial Code which the Company has the right to void the insurance contract and not to make any policy payment. Warnings:

- Investments are risky. The insured may receive more or less money than the premium value that is allocated to mutual funds. If a mutual fund performance has profit, the insured will receive high return. However, if mutual fund's performance has dropped, the insured will receive low return or might receive a loss in some cases, meaning that investment amount to be received may not be in full. Moreover, this policy does not guarantee the investment amount.
- This policy is suitable for long-term savings. As there is surrender and partial withdrawal fee, the partial withdrawal amount or cash surrender value may be less than redemption value. The insured should study details from the expense table and the surrender fee table.
- The insured should study the details related to risk from mutual fund investment in the prospectus.
- Mutual funds are juristic persons independent from the life insurance company and asset management company. As such, the life insurance company and asset management company are not obligated to compensate for losses sustained by the mutual funds and are prohibited from using the mutual funds' assets to settle its own debts.
